

DR. CALDWELL SAW GERMANY ENTER LEAGUE

Had Interview With Marshal Pilsudski
At Polish War Office

VISITED GENEVA

Met Paderewski — Europe
Was Keenly Interested in
Canadian Election

On being asked by a "Daily" representative about his summer trip, Professor Caldwell said that he was glad indeed that with the help of Mrs. Caldwell, and that of their many friends, he had been able to carry on, to some extent, the work of sympathetic study and understanding between the old world and the new, which it was his privilege to begin in 1921, when he went to England and to Scotland as one of the four McGill Delegates to the then Congress of the Universities of the British Empire. It was a great pleasure and a great advantage, he said, to meet again in London and in Cambridge, at the Empire University Congress of this year many of the same men and women that he had met in 1921 as well as many new people. At one of the sessions this year in Cambridge Professor Caldwell spoke on an aspect of the Imperial Education question, while other McGill professors were also speaking and reading papers at different sessions.

Dr. Caldwell states that he is still a believer in the New Europe and the New Spirit that despite many detractors and despite many difficulties, and despite books like those of Spengler and Nitti and Wells and others, undoubtedly exists "over there." It would take too long, to speak of this, and to try to prove it, but it could be done. The crowning happening, Professor Caldwell said, of his trip this summer after much privileged opportunity in London and in Central Europe was the participation that fell to his lot in the great epoch marking sessions of the League of Nations at Geneva in September. This year's meeting was undoubtedly the greatest of all meetings of all the years, owing to the spectacular and the expected entrance of Germany as a full member, first on the Council and then in the Assembly. Of this, Professor Caldwell has spoken in the public press here and in London. It has often been his desire, he said, to go to Geneva and the League, despite the criticisms that both had received. This opportunity came in the most interesting way this summer. He and Mrs. Caldwell were asked to travel with the Polish delegates from Warsaw to Geneva through Poland, Czechoslovakia and Austria, making a halt in Vienna and in Zurich.

Dr. Caldwell said, that at Geneva he and Mrs. Caldwell found many friends in the different legations, the British, the Canadian, the Czechoslovakian, the Polish, the French and so on, in the representatives of the League and the continental press, in old and new acquaintances from all over Europe and America. Among these, for example, were Professor and Mrs. Basil Williams, formerly of McGill and now of Edinburgh. Then there was Mr. John Bieler, an old McGill man, the son of Professor and Mrs. Bieler, of Montreal. Mr. Bieler is now a valuable and an experienced official of the permanent secretariat of the League. Owing to the resignation of his chief, Sir Herbert Ames, who is still in Geneva, he was this autumn charged d'affaires of the permanent Canadian delegation and, is now a very well known man indeed in Geneva. Incidentally, Mr. Bieler has one of the most interesting flats in Geneva, adjoining the very roofs of the great Cathedral (the Church of John Calvin), and commanding a fine view of the entire city and the Lake towards Lausanne. Professor and Mrs. Caldwell had the pleasure of dining there when Dr. Etienne Bieler, of the McGill Physics Department, also happened to be there with his brother.

Another Canadian friend with whom Professor Caldwell talked in Geneva was Canon Cody of Toronto (who had the honour of preaching the second of the great sermons in the Geneva Cathedral, in connection with the session of the League. And of course every one is convinced of the need of the sound religious feeling that must accompany the work and the attitude of the League of Nations. The League is in a sense the descendant of the Council of Constance that attempted to rally all Christendom. Canon Cody's predecessor on the first of the great September Sundays was the great Archbishop Soderblom of Uppsala, Sweden, one of the greatest

COL. THOMPSON RENDERS THANKS TO STUDENTS

Lt. Col. R. R. Thompson wishes to express his thanks to those students who undertook police duties on the Campus for the H. A. C. Review on Oct. 5th at the shortest possible notice. Their duties were very efficiently and tactfully performed.

CHORAL SOCIETY TO PRODUCE AN OPERA

"Tom Jones" Will be Season's First Offering

OFFICERS ELECTED.

Professor Clapperton Spoke
— Next Meeting to Take
Place on October 14

The McGill Choral Society met for the first time this session on Thursday October 7, 1926. As soon as the preliminary matters had been disposed of Mr. Clapperton addressed the meeting.

After the final report of the session 1925-1926 had been read by the secretary, Miss Gilman, Mr. Lyman moved that an amendment be added to the present constitution to the effect that a publicity secretary be chosen. This motion was seconded by Mr. Fitzgerald, and was carried unanimously. Mr. Fitzgerald was chosen to fill this position. Mr. Allen then read the constitution. The financial report of last session was also placed before the meeting. Miss McIvor was nominated for the position of vice-president of the society, this motion being seconded by Miss Ball, and she was elected unanimously. Mr. R. Thorpe was elected unanimously as recording secretary while Miss Slotter was chosen corresponding secretary.

Mr. Clapperton then kindly consented to address the meeting. He congratulated the society on the good attendance at the first meeting this session. He dwelt positively on giving "Tom Jones" as an Opera and outlined the plot briefly, playing some selections from it. He also stressed the point that all the members should be as punctual as possible, because the work in hand this year entails considerable more work than in former years.

When put before the meeting as a motion, it was unanimously carried that "Tom Jones" be produced as an Opera and not simply vocally.

The next meeting of the McGill Choral Society will be held on Thursday October 14, at 8.00 p.m. sharp, in the McGill Conservatorium of Music. The Society still has room for more members. Men will be particularly welcome.

R.V.C. '28 ELECT OFFICERS

Beatrice Tweedie President and
on Annual Board

The election of class officers and representatives for 1926-27 took place at a class meeting of R.V.C. '28 yesterday with the following results:

President—Beatrice Tweedie.
Vice-President—Ruth Heertz.
Secretary—Treasurer—Jerry Ulyers.
Daily Representative—Virginia Campbell.
Tennis Manager—M. Binnmore.
Basketball Manager—Beatrice Carter.

Sports Manager—Marian Ross.
Hockey Manager—Helen Gilman.
Poster Manager—Francis Prussick.
Rep. on Annual Board—Beatrice Tweedie.

Reps. on Junior Prom Committee—Jean Reid, Daphne Paterson.
After the election of officers Miss Wyers resigned the chair in favour of Miss Tweedie. The question of class fees was brought up for discussion and satisfactorily settled. After Miss Tweedie had, in a few well chosen words expressed her gratitude to her electors the meeting adjourned.

ROWING EXECUTIVE

There will be a meeting of the executive of the McGill Rowing Club in the Union at 5 o'clock on Wednesday, Oct. 13.

churchmen of all Europe, a man who is really helping to make Christianity the force it was intended to be. The Archbishop knows England and English thought well, and Dr. Caldwell said that he felt it to be a privilege to talk over things with him. Soderblom of course, preached in French in the Cathedral, and Canon Cody in English.

(Continued on page four)

REUNION SPIRIT WAS MANIFEST AT BIG DINNER

No Speeches Delivered But Many
Impromptu Talks

PAST RECALLED

McGill Band and Hotel
Orchestra Rendered
Selections

They had a good time at the Graduates' Banquet last night. Primarily because they had no speeches and secondly because they had a good banquet. The true spirit of reunion and conviviality manifested itself throughout, old friends were found, new friends were made, and everybody present enjoyed himself.

So many turned up at the Mount Royal Hotel that there was insufficient seating accommodation for them all and extra tables had to be erected. These were placed in an ante-room, and one of the tables was used as an impromptu blanket, to toss up some popular member of a class that graduated years ago.

The McGill University Band, alternated with the hotel orchestra. Both supplied plenty of music throughout the evening. Such old favorites as "Mademoiselle from Armentieres", "The Hamburg Show", and "Here's to the Good Old Beer", proved especially popular with the thousand graduates who assembled on the occasion of the 105th anniversary of McGill, last night.

Red and white candles on each of the tables added to the effect, whilst the tables designating the various classes that occupied each separate table, showed that every class from 1870 up to 1926 was represented at the Reunion. From time to time, each class would shout out its yell—yells that years ago had made the old campus rings, but were now reserved for such occasions as this.

Shouts, yells, impromptu talks at each of the tables, and even a minor explosion at the beginning of the banquet were provided as special forms of distraction during the evening.

Among those who sat at the head table were: Principal Sir Arthur Currie, Dr. A. T. Bazin, President of the Graduates' Society, Dr. A. S. Eve, Director of the Department of Physics, Dr. Ira Allen MacKay, Dean of the Faculty of Arts, Dr. F. G. Finley, upon whom the degree of LL.D. was conferred at Founder's Day Convocation, Dr. C. A. Austin of Queen's University, Kingston, Dr. R. D. MacDonald, of Sutton, Quebec, Colonel Herbert Molson of the Board of Governors, and the Rev. Dr. Elson I. Rexford, Principal of the Diocesan Theological College.

MECHANICAL CLUBS PLAN YEAR'S TRIPS

Will Visit Breweries and
Other Plants

A meeting of the Mechanical Clubs was held yesterday in the Engineering Building at 5 p.m. A. M. Johanson was elected representative from second year, but it was decided to postpone the election of all other officers to a later date. The minutes of the last meeting were read by the secretary and were approved of. Suggestions for future trips to various machine shops, breweries, plants, etc., were called for. It was decided that the club should visit Grend Mere, Canadian Vickers, the Montreal Locomotive Works, the Angus Shops, the Canadian Foundries, the Consumers Glass Works, the Dominion Wire and Rope Factories, and the Canadian Liquid Air Plant.

The next meeting will be held on Thursday, October 12, in room 33, Engineering Building. Everyone interested is cordially invited to attend, especially first and second year men.

NEW SCIENTIFIC SOCIETY FORMED

Although the majority of the students do not know it, there has been in existence for the past few months a body of McGill students functioning as "The Amateur Scientific Association." The activities of this society are concerned solely with the discussion of scientific subjects. Those interested please get in touch with L. J. Korenberg, Arts '29, c.o. the Union.

Plans Complete For Union House Dance on Friday

The Union House Dance Committee announced last night that Freddie Gross' orchestra would supply the music for next Friday's formal.

Tickets to the approximate number of one hundred and fifty will be placed on sale Tuesday.

Lighting effects will form the chief part of the decorations. These are under the direction of Ian Archibald and Nell Stewart.

The committee also promises a surprise in the way of favours, which are designed for utility, instead of ornament.

Pierre will have charge of the refreshments.

FORMER EDITOR OF M'GILL ORGAN HERE

A. P. Solante, '87, Visits
Daily Offices

METHODS EXPLAINED

Men Trained by Switching
into Various Fields of
Journalism

An insight into the methods of running campus publications 40 years ago was given to a few members of the Daily Staff yesterday morning when A. P. Solante, class of Arts '87, and a former Sport and Exchange editor of the McGill Gazette visited the editorial offices of the Daily.

Mr. Solante, who is in Montreal on the occasion of the Graduates' Reunion, had many interesting things to tell in connection with the old Gazette. Subscriptions, in those days were not collected through the easy method of the Universat Fee, he said, "but had to be solicited among individual students. In order to promote interest in the Campus Publication, the editors after wrote violent critical letters, under noms de plume. These they answered themselves, under different pseudonyms."

The interest thus created through the medium of their correspondence column after served to increase the circulation of the Gazette, according to Mr. Solante.

The Gazette during these days was under the supervision of R. J. Elliot as editor-in-chief. Mr. Elliot was a particularly brilliant newspaperman and desired to give all his sub-editors a thorough training in all the field of journalism. He therefore switched his men into all positions on the paper. Thus it was, that Mr. Solante, who visited the Daily offices yesterday, occupied the positions of Sports Editor and Exchange Editor, both within the space of one year.

For some time after his graduation, Mr. Solante was a university professor. "But later on I got wiser" he said, "and quit that job." Mr. Solante, who will be 70 years of age at his next birthday is at present retired from active business.

HINK RUSSELL, PRESIDENT

Arts '27 Holds Election of
Officers

J. V. (Hink) Russell was elected president of Arts '27 at a meeting of the senior year held yesterday. J. S. B. Pemberton was chosen vice-president, while Saul Hayes and Brock Jamieson were elected secretary and treasurer respectively.

Gordon Davidson, last year's president, presided at the meeting and S. B. Millen, who was treasurer of the class in its junior year, reported a surplus which announcement was met with vociferous applause by those present.

After considerable discussion it was decided to postpone the election of valedictorian and other positions connected with the graduating exercises to some later date so as to give the members of the class sufficient time to ponder over these important matters. The date of this meeting will be announced in the near future.

Arts '27 in addition to being the first class to abolish hazing voluntarily, will possess the signal honor of being the first class to graduate from the new Arts Building.

NEGRO REGISTERS

Paris, Oct. 8.—A negro pupil has just been admitted to the Higher Normal School for the first time in its long history. He is Lenis Blanche, a native of the Island of Guadeloupe. He is 50 years old.

FRENCH NOT HOSTILE TO FOREIGNERS

Dr. Bieler Tells Of Summer's Visit
To Europe

MET MCGILL MEN

Attended Meeting of British
and Swiss Science
Societies

"The report that foreigners arriving in France are being received with demonstrations of hostility is largely an exaggeration on the part of the press," stated Dr. Bieler who has returned from an extensive tour of western Europe during which he visited the leading physics laboratories of that region.

Dr. Bieler left during the month of June and made the trip across with a group of students on the Empress of Scotland. While aboard he met several former McGill men among whom were R. J. Clarke, who was formerly a demonstrator in the Physics Department and who is now working under Ernest Rutherford in the Cavendish Laboratories, and also Dr. Morrison formerly of the Chemistry Building.

During the past summer Dr. Bieler visited some of the leading laboratories of England and France, and also attended two scientific conventions of importance in England and in Switzerland.

One of the most interesting laboratories in France, stated Dr. Bieler, is certainly the one in which the Duke de Broglie and his associates are studying the production and the physical properties of X-rays. The heir to a great line of ancestors distinguished in French political life, the Duke has set apart a portion of his mansion as a laboratory in which he and a half dozen or so associates devote their lives to the study of X-rays. In quite another quarter of Paris, in the very centre of the Quartier Latin, in an obscure corner of the Sorbonne, are the two small rooms where Professor Jean Perrin the physical chemist, has done so much outstanding work on "Radiation in Chemical Action." One is glad, Dr. Bieler said, to know that Professor Perrin is soon to move to better lighted and more commodious quarters near the Radium Institute.

In England Dr. Bieler visited the Davy-Faraday laboratory of the Royal Institution, where Sir William Bragg and his pupils were using the X-ray in investigating the nature and arrangement of crystals. He spent some time in Cambridge, and visited the

(Continued from page two.)

RIFLE ASSOCIATION ELECTS OFFICERS

Intercollegiate Rifle Competition
in Three Weeks

The Rifle Association met in the Union yesterday at five o'clock. The purpose of the meeting was to elect officers, owing to the fact that F. H. W. McKenzie, the President, resigned because of pressure of work and because the office of Secretary-Treasurer has been split in two. C. H. Herbert was elected President, F. D. Taylor Secretary, and J. M. Pope, treasurer. Plans were also discussed for the practices and for putting the rifles in good repair.

The Intercollegiate rifle competition takes place in three weeks. It is particularly wished that anyone who has done any previous shooting at all should turn out. In Intercollegiate Competition any person can shoot, and the top eight scorers form the team. This means that everyone has a chance.

Practices are held every Sunday at 10 a.m. at the Pointe-Aux-Trembles Rifle Range. Those intending to shoot on Sunday will meet at Strathcona Hall, bring their lunches. Rifles and ammunition are of course provided.

For the Intercollegiate Competition each team shoots on its own range. Queen's are reported to have a very strong team, numbering two Blesley contestants, namely Desmond Burke, King's Prize winner of two years ago and MacGregor, Toronto has also a very strong team, being considered equally as strong as last year, when they were beaten by Queen's by only three points.

Sir Arthur Currie is Honorary President of the Club and in the past has always shown a very keen interest in the doings of the Association.

N.A. Mackenzie Arrives Here For Conference

The president of the Student Christian Federation, Mr. N. A. Mackenzie, B.A., B.C.L., arrived at the university yesterday where he will probably remain over the week-end.

He is here primarily to attend a conference of student officials to be held at Beaconsfield on Sunday. He is also taking the opportunity of seeing the McGill-Varsity game this afternoon and, being the Associate Professor of Law at the University of Toronto, he will of course root for Varsity.

Professor Mackenzie has spent two years at Cambridge, and was formerly president of the S. C. A. in the Maritimes. He is well-known abroad in his capacity as legal advisor to the Labour Bureau of the League of Nations.

GRADUATE SOCIETY ELECTS OFFICERS

Dean H. M. MacKay, Pres.
Dr. A. C. Howard, Vice-pres.

Dean H. M. MacKay of the Faculty of Applied Science was elected president of the Graduates' Society yesterday; and Dr. A. C. Howard of Medicine '0, vice-president.

The executive committee consists of Mabel Corner, Arts '16; H. L. Fetherstonhaugh, Architecture '09; Dr. L. M. Lindsay, Medicine '09; and Dr. C. F. Moffatt, Arts '10; Medicine '15.

G. E. McCuaig, Science '06 was elected to represent the Graduates' Society on the Board of Governors. The Council was chosen as follows:

E. S. Bieler, Arts '16; A. A. Bowman, Science '09; Dr. J. G. W. Johnson, Arts '00, Medicine '04; A. G. L. McNaughton, Science '10; and Dr. G. A. Perkins, Arts '15; Medicine '21.

Representative Fellows on the Corporation of the university are: Law, W. L. Bond, Arts '94, Law '97; Science, G. K. McDouall, Science '04. Non-resident representative Fellows are—Maritime Province and Newfoundland, Dr. Cluny MacPherson, Medicine '01, St. Johns, Nfld; Ontario—H. M. Ami, Arts '81, Ottawa; Manitoba, Saskatchewan, Alberta, and British Columbia, F. H. Newburn, Science '81, Edmonton, Alta. Counties outside of Canada and Newfoundland, Dr. Casy A. Wood, Medicine '06, Chicago, Ill.

WHAT'S ON

TODAY.

12.00—University Lodge; Masons No. 84, G.R.Q.
1.30—R.V.C. Rooters in R.V.C.
2.30—McGill vs. Varsity—Football.

COMING.

Oct. 10th.

Union House Dance.

JUNIOR CLASS HOLDS MEETING

Commerce '28 Chose Their
Officers

Chick Petch was elected president of Commerce '28 at the meeting held yesterday. Bruce Spears and Max MacKenzie were elected as Vice-President and Secretary-Treasurer respectively.

Elections for the Annual Board and Junior Prom-representatives were also held at this meeting. Gordon Nelson being chosen as representative on the former and Fred Pugh as the representative on the latter.

CORRECTION

At the Arts '30 meeting on Thursday last John Arnold was elected treasurer of the class not Markham as previously announced in the Daily.

MOYSE HALL SCENE OF BIG GRAD MEETING

Sir Arthur Addressed Old Boys In
Memorial Hall

OTHERS SPOKE

Lower Registration due to
Higher Standards — Faculty
Facilities Developed

The new Moyse Hall was the scene yesterday morning of the only business meeting that the visiting Graduates have been called upon to attend, when the Graduate Society held a meeting to which all the graduates who registered for the Reunion were invited. The attendance was fairly large, and the assembly soon resolved itself into a business meeting of the society. Dr. Bazin, professor of Surgery, and president of the Graduates' Society, was in the chair, and after a few introductory remarks of welcome to the visitors who might not happen to belong to the society, he called upon Sir Arthur Currie to say a few words.

Sir Arthur joined wholeheartedly in the remarks of Dr. Bazin, welcoming the graduates to McGill. He humorously announced that he had already spoken four times, and hoped that the threat of another speech had not kept too many of the graduates away from the meeting. However, he hoped that he was emphasizing more and more the welcome which he so greatly wished to impart to the graduates. The meeting was being held in a hall dedicated to the memory of a very great man in the history of the university, the late Dean Moyse. It and the Arts building were a tribute not only to his high ability, but also to the department of architecture, and to the contractors, Fetherstonhaugh & McDougall, who were also very highly respected graduates of McGill. He hoped that all those present were satisfied at the progress which was evidenced by the fact that such fine new quarters had been supplied to the Arts Faculty. He had often been accused of undue neglect of this important branch of the college, giving time and money to the faculty of McGill, but he hoped that the very sight of the beautiful new quarters of the faculty would now silence all these accusations.

Sir Arthur told the graduates that he had spent six very happy years at McGill University. He had, even before he had come to the University, very close associations with McGill men, and they had always shown themselves to be fair in business, and very famous fighting men. He had had no serious difficulties with the students, and his relations with the staff had always been of the most cordial. The graduates too, had always shown themselves to be extremely sympathetic.

The principal also touched, in a humorous vein, on the numerous anonymous letters which he received on all occasions and gave several examples of these futile efforts, and childish expressions of opinion.

Sir Arthur Currie reviewed the last six years as a period of marked progress and of higher standards at McGill. It is true that the attendance has not been growing, but this is due in great part to the fact that higher entrance standards have been exacted from year to year. McGill had taken up a policy of receiving only the best

(Continued on page two.)

R.V.C. STUDENTS PRESENT PAGEANT

Proved to be Feature of
Graduate Dinner

Miss Brittain presided at a dinner for R.V.C. graduates given in the college last night.

Miss Gurd '26 proposed our Alma Mater and Miss Hunter, of the first class of R.V.C. replied giving some interesting reminiscences of the first days of the college. Miss Hurlbatt also gave a short speech in which she welcomed all the graduates and introduced the cast of the pageant which was presented by present under-graduates in costumes dating from 1833 to the present. Miss Armstrong '16 and Miss Perrin '25 gave musical solos which were greatly appreciated. During the dinner a message was received from the men in reply to one sent to them from the women.

Graduate dinners appear to be very popular and the success of last night's entertainment augurs well for future reunion.

MONTREAL, SATURDAY, OCTOBER 9, 1926.

SUPPORT YOUR TEAM.

This afternoon, for the first time in two years, the rooters will turn up on the campus and, led by the University Band, parade to the annual intercollegiate rugby classic at the Stadium. The resumption of this excellent practice after a lapse of a year deserves to be highly commended.

Such a move exhibits a finer university spirit, a spirit which perhaps was not lacking during the past year, but one that was at least partially dormant. The rooters will thus present a united front; they will make an impression; they will show the team that has been working so hard during the past fortnight that they, too, are out to win.

But the parade will not do all. It is the duty of the rooters to support the team after they reach the Stadium; it is up to them to cheer from the kick-off until the final whistle. As Gordon Hughes, rugby captain, said only a few nights ago at the Pep Rally, "When any player makes a mistake on the field don't just sit back and say 'Oh Hell,' but put your whole heart into the cheering. It helps a whole lot, and I don't mean maybe." Need we say more?

Freshmen, Sophomores, Seniors and Graduates; everybody in fact—turn out this afternoon and cheer your team to victory!

LAW OF SUCCESS.

When Sir Isaac Newton discovered the law of gravitation he did nothing towards establishing that law. It had always existed and it always will exist for the benefit of all those who wish to use it. All Newton did was to reason out the operation of that law and to learn how he, and you, and I may adapt ourselves to it.

All natural laws always have and always will exist and nothing you or I may ever do will ever alter them in the slightest. Unlike man made laws natural laws do not work because somebody makes them work. All we can do is to gather the conditions most favorable for the working of the law we wish to place in operation.

All of which is prompted by the question you constantly hear asked by students everywhere. "Why is it that in every College, every faculty, every class, where all students apparently have the same opportunities, you will find such wide divergence in scholastic and social standing? One man, apparently of no greater intelligence than the average will lead his class while another of equal intellect will fail. One man will be elected to many different offices in the hands of his fellow students while a fellow classmate of apparently equal possibilities will hold no office." The same holds true after they finish college. Look at any organization or profession. You will find folks who look much alike, who talk the same language, who are possessed of more than the average intelligence, qualities which seem to entitle them to a fair degree of success in their chosen work. Or take the two extremes, the topnotcher and the fizzle, and compare them. You will find superficial differences, differences of speech, dress and temperament, but not enough to account for the astonishing disparity of results. Therefore the difference must be much deeper.

We must conclude then that the successful person has discovered some Law of Success and has learned how to use the operation of that Law to his own advantage.

And this is the Law that he has discovered. That Law of Correct Mental Attitude. He gets the correct habit of thinking and doing. He stops all purposeless meandering and gets down to business. He does not think of his work as merely a means to an end, neither, on the other hand, does he give an exaggerated position of importance to the work he has on hand. He is careful to rid his mind of all thoughts that hold him back, and instead of attributing his failures to "circumstances" or "fate", looks within himself to find the trouble. "Kidding yourself along" only makes it doubly difficult for anyone to help you.

The Law of Success has no need of being adjusted. It is always ready to operate for your advantage. Keep your own mind in harmony with the Law and the Law will take care of itself,—and you.

OF SERVICE.

We profit in exact proportion to the service which we render. The man who serves a single employer in a small capacity is paid for his work. The person who serves a large corporation in an important capacity receives a larger remuneration. The individual who serves a community receives more of honor and pecuniary reward because of the broader knowledge, heavier responsibilities and larger helpfulness which he renders. The man who serves his province or his country as Premier or President has more people to please and more weighty matters to determine than the one of fewer cares. In consequence he is paid in money and in homage of the people both today and tomorrow in history.

If we would profit largely then it is evident that we must serve many and in a manner acceptable, honorable and unusual.

Correspondence

The Editor,
McGill Daily.

Dear Sir: Last year it was announced that henceforth the "Daily" would have no politics and consequently would no longer voice opinions of a controversial nature in its editorial columns. To-day's issue apparently revokes this policy, though why the old flag issue should have been chosen for a beginning is difficult to understand.

It may be wasting time to remind you of the several reasons why Canada should have an official flag of her own. I shall merely say that since both political parties unite in affirming that Canada should decide for herself whether she should join Britain in future wars, and since Canada has recently appointed her first official foreign ambassador and more may be expected to follow, therefore in taking her place in world affairs as a nation, Canada should have her own flag to fly alongside the flags of other nations.

If, as you say, the Union Jack is the flag of the British Empire, then let it be flown along with the Flag of Canada as it is with the Flag of Australia.

Yours truly,
DROMIO

MOYSE HALL SCENE OF BIG GRAD MEETING

(Continued from page one.)

of the large number of students who annually apply for admission. In Medicine, for instance, only one hundred new men are received each year, yet there are more than five hundred applications for admittance. "We believe in drawing the best students that such an institution can receive. It is better to have a student body of 2,500 splendidly equipped earnest young men than to have 5,000 students, many of whom ought not to be in the university at all."

Sir Arthur referred to the wonderfully increased facilities which have been added within the last six years. He was very proud of the changes that had been produced in certain of the courses. The Faculty of Arts had raised its standards, and more tutorial teaching now took place, with the added impetus to the student from personal contact at all times with his professor. The graduate school had developed amazingly, while in the faculty of Applied Science there has been more improvement in the last five years than at any other time in its history. Sir Arthur concluded by asking the graduates to take a copy of the booklet called "Six Years at McGill", which they would find a faithful account of his stewardship during that period.

Mr. Walter Molson, the graduates' representative on the board of governors was then called upon by the president. During his term on the board, he had seen clearly that the governors were very glad to take any suggestions that the graduates had to offer. It was the first time that he had been called to report before a general meeting of the graduates, but he was sure that they would accept his statement that he had always acted on the board to the best interests of McGill.

Dr. Bazin highly commended the work of Mr. Molson on the board of governors, and corroborated the speaker's statement. He then called on the

S.S. MARY BOOS CONCLUDES HER EXTENSIVE TOUR

Frank Godine Saves Life of Patrian Leader

AT CHIEN CHAUD

Hon. G. Webster Howled Down at Goose-Flesh, Yukon

Whaleback, Gasping County, Que., Oct. 8.—(Special to McGill Daily).—The S. S. Mary Boos arrived here this morning after an extensive tour of the Bay of Chaleurs. A distinguished party of parliamentarians was on board, including the Hon. Will E. Boos, Minister of Finance; the Hon. J. Llexander, Minister of Customs; the Hon. J. A. E. Macdonald, Minister of Trade and Commerce; and their wives. The party seemed in high spirits, after spending two weeks at sea (and \$200,000 of the public funds) in an attempt to establish a new Market for Made-in-Canada rugby balls among the numerous schools of dolphins off the Newfoundland coast. The party had a number of interesting experiences to report. On one occasion the Minister of Finance had a sharp argument with a sword fish with rather touching results. At Speedy, Que., the party received a royal welcome from the local bootleggers and the other inhabitants.

The manufacturers, importers, and exporters of this centre of Canadian Industry are working night and day. This unprecedented prosperity they attribute, without exception, to the open door policy of the Patrian Government.

Iceberg, Man., Oct. 8.—(Special to McGill Daily).—The report that the Rt. Hon. John Humphrey had been frozen to death at Chien Chaud, last evening, has been officially denied. The Premier was severely frostbitten by the cold reception he received from the crowded hall. Due to the quick-wittedness of the Hon. Frank Godine, Minister of Health, the leader of the Patrian Party probably owes his life. The Minister of Health, with a sudden flow of hot air for which he is noted, so materially raised the temperature of the room, that the Prime Minister was restored to consciousness.

Goose-Flesh, Yukon, Oct. 8.—(Special to McGill Daily).—The leader of the opposition, Hon. G. Webster, was howled down here to-night when he attempted to oppose the erection of dormitories at McGill. Local opinion is all in favour of the erection of dormitories, as the situation at McGill is acute. Students at McGill, it is reported, both men and women, are walking the streets of the city in

secretary, Mr. George MacDonald to outline a change which was intended in the constitution of the Graduate Society, whereby a local branch of the society could be formed. The meeting then turned to a short business conference. A short discussion also took place relative to the policy which the society should pursue in regard to the present rugby situation. Mr. Hamilton, Mr. Robertson, and Dr. Ami, of Ottawa took a leading part in the argument. The meeting was then adjourned.

Looking Backward

Thirteen years ago today, Oct. 9, 1913.

The physical department secured the use of the floor of the Central Y.M.C.A. The University bears the expense of this arrangement.

B. A. MacFarlane was elected president of the graduating class at McGill this year.

The Rooter's practice to be called off and postponed indefinitely on account of the lack of interest shown. Only about thirty turned out to the practice.

The McGill Band consists of twenty members, one of the largest bands the Rooters Club has had for some time.

FRENCH NOT HOSTILE TO FOREIGNERS

(Continued from page one.)

Cavendish Laboratory, where Sir Ernest Rutherford and his associates are doing research work in connection with the atom and its nucleus. One of the people at work there was A. L. Patterson, of Arts '23; who has now gone to Germany to carry on further research on similar subjects.

All the knowledge of the radiations from radium which he and his colleagues laboriously collected during his professorship at McGill from 1898 to 1907 is serving him in good stead in these investigations.

One of the most outstanding scientific events of the summer and one which Dr. Bieler attended, was the meeting at Oxford of the British Association for the advancement of Science. The Prince of Wales had consented to preside at the Assembly, this year, and even greater crowds than usual gathered in the Sheldonian Theatre to hear the opening address. The opening was marked by all the pomp associated with academic functions in the old university.

The Physical Section concerned itself mainly with Atomic Physics. One of the questions which is foremost in the minds of physicists today is whether the phenomena of Atomic Physics are to be explained as the basis of the mechanics of Newton and Maxwell. A great deal of discussion on this point was carried on by the numerous physicists present and many theories were presented. The Classical explanation of Atomic Phenomena was advocated by Professor L. V. King of McGill University.

Another meeting of great interest according to Dr. Bieler, was the one hundred and seventh annual meeting of the Swiss National Science Society, held in the picturesque little town of Fribourg.

search of lodgings. With the coming of winter, they find starvation, degradation, and petrification staring them in the face. The situation must be remedied.

BLUE AND WHITE SQUAD CONFIDENT FOR OPENING GAME

Victory in Today's Struggle
ROOTERS' PARADE
Monster March to Stadium Will Start From Union at 1.30

Confident of victory, Coach Ronnie McPherson led his blue and white squad into Montreal last night to officially open the 1926 intercollegiate football season with McGill at Molson stadium this afternoon. Confidence and more confidence pervades the Varsity camp for their first intercollegiate tilt and many of the Toronto supporters even claim to foretell the final score: 16 to 5 for Varsity, they say.

Trimble, Snyder and McPhayden are the trio that the Varsity supporters are pinning their hopes on, and claim that the blue and white half line is the strongest of the three intercollegiate standard bearers. The line, they say, can hold its own and the edge in the backfield will give them the victory. The Varsity line this year is the heaviest that has worn blue and white for years and though lacking experience is expected by the Toronto pilgrims to make up for in weight what they lack in seasoning.

Pitted against Varsity will be a McGill team that, though handicapped by a short period of training is conceded by the cold critics to have an even chance with Toronto. The past week has shown some great progress in the red and white squad and though not conceded to have a chance after last Saturday's game, has improved into a smoothly-working aggregation that will go into the struggle with Varsity an even chance to win.

With the first intercollegiate struggle attracting many thousands to the stadium and the graduates winding up their week's re-union at the game, a capacity crowd is certain. A rooters' parade will initiate proceedings for the McGill supporters who will line up in front of the Union at 1.30 where the march to the stadium will start, lead by the Rooters' Band, resplendent in the McGill blazer. Rooters will receive bleachers tickets in exchange for the stubs, but no one will get a ticket unless he is in the line-up for the parade.

MCGILL PLAYS SUN LIFE

Rugger Team Engage in Last Practice Game

The McGill English Rugby team play their last practice game with the Sun Life team before the beginning of the McTear Cup League on the McGill Campus at 1.30 today. This early hour is to enable the team to see the Bermuda—M. A. A. A. game at three o'clock.

The line-up for this afternoon is as follows:—

1 Ramsey; 2 Evans; 3 Noble; 4 Ried; 5 Grimes-Graeme; 6 Angevine; (Captain); 7. Howell; 8 Knowles; 9 Sterling; 10 West; 11 Butler; 12 Redpath; 14; Starkey; 16 MacRoberts; 16 Kincald; 17 Playfair.

Australian Cricketers Here

The Australian Cricket Team, heroes of the five test matches against England this summer, are returning from their eight month trip via Victoria, B.C. Their entire transportation requirements are being handled by the Canadian Pacific Railway. They arrive at Quebec today on the SS. Montrose. Their itinerary includes a flying visit to the United States, after which they will return to Canada, to make the long transcontinental journey. The team is made up of the following:

Top Row: J. L. Ellis, H. L. Hendry, J. M. Gregory, J. S. Ryder, A. J. Richardson, S. C. Everett, Sydney Smith, (Manager). Middle Row: A. A. Malley, C. V. Grimmett, Warren Bardsley (Vice-Captain), H. L. Collins (captain), C. G. Macartney, T. J. E. Andrews, J. M. Taylor. Front Row: M. Woodfull, W. H. Ponsford and W. A. Oldfield.

SOPHOMORES WON EASY VICTORY IN ANNUAL MEETING

Defeat Frosh 89 to 31 in Track Competition
RECORDS EXCEEDED
Consiglio and Cummings Both Bettered College Marks

Last year's freshmen, returned to college as sophomores, upheld their record on the track by defeating the class of 1930 in the annual meet held yesterday afternoon at the Stadium. The sophomores scored 89 points while the freshmen were able to gather only 31.

The weather was far from ideal for a track meet, but notwithstanding this, the college marks were excelled in both the javelin throw and the pole vault. Consiglio exceeded the pole vault mark and Cummings threw the javelin further than has hitherto been recorded. These marks, however, will not go down as records unless they are repeated or bettered at the official college track meet next Friday.

The 880 relay race was not run, the win being granted to the sophomores by default. The extra half mile open race was particularly good, though a McGill man was unable to place. Wilson, bearing the colours of the Montreal Harriers took this event, with Crites and Dorothy, both of M.A.A.A. taking the other two places.

A particularly good race was the low hurdles, in which Blemer, Irvine and Urquhart strained themselves for victory, the first named man finally getting the highest points. In the high hurdles Ursuhart was well in the lead, but was disqualified.

Speaking of yesterday's meet, Coach Van Wagner said, "There is considerable material among the freshmen, and the performance on the whole was better than last year. Of course we shall be able to tell more after the meet next week. For the present I may say that things may generally be considered satisfactory."

Following are the results in the different events of the meet.

Discus
Weldon (S), Urquhart (S), Harris (S), 96 ft. 5 ins.
Pole Vault
Consiglio (S), Adams (S), 11 ft. 6 ins.
120 Yard High Hurdles
Beatty (S), 21.1 seconds.
880 Yard Run
Parish (F), Solomon (S), Woodwash (F), 2 mins. 11 3-5 secs.
100 Yard Dash Finals
Fraser (S), Harris (S), Hanlon (F), 10 3-5 secs.
High Jump
Consiglio (S), Fraser (S), Wykes (F) 5 ft. 4 3-4 ins.
Snot Put
Cole (S), Weldon (S), Urquhart (S), 35 ft. 9 3-4 ins.
220 Yards
Hanlon (F), Spence (S), Swabey (F) 24 2-5 secs.
Broad Jump
Blemer (S), Consiglio (S), Wykes (F).
One Mile Run
Brown (S), Calhoun (F), McMaster (S), 5 mins 1 1-5 secs.
Javelin
Cummings (F), Urquhart (S), Weldon (S), 143 ft. 1-2 in.
Low Hurdles
Blemer (S), Irvine (S), Urquhart (S) 28 secs. flat.
440 Yard dash
Harris (S), Strain (S), Parish (F), 55 1-5 secs.
Three Mile
Balmer (F), McNaughton (F), Calhoun (F) 16 mins. 18 2-5 secs.

DENTS AND MEDS WON FIRST TILTS

Took Opening Games in Interfaculty Rugby Series

The Interfaculty rugby schedule opened yesterday with a double header; Dents, taking the first game from Commerce by the score of 17 to 1, and Medicine beating out Science 7 to 6.

It was easily seen that the latter game was by far the better of the two although the feature events seemed to be usual for fumbles. Meds. received their first three points when Gibson kicked a drop from the twenty-five yard line, and the Science men retaliated almost immediately by scoring a rouge. The last quarter found the Science boys making two or three broken field runs, and a few minutes before time they put over a touch which brought the score up to 7 to 6. They failed in the convert and the game ended at that score.

The line up:

MEDICINE
Flying wing
Allen Thoran
Holland Doran
Gibbons Guthrie
Schwartzman Cunningham
Quarter
Chisholm King
Snap
Patterson Montgomery
Inside
Sutherland Bowles
Gardner Desbursy
Middle
McLeod Vokes
Vineberg Yulle
Outside
Ramsay H. Doran
McDiarmid Thomson
Spares
Taylor
Sissons
Taggart
Campiong
R. F. Desbursy

The Dents had everything on the Commerce boys, as shown by the score, but were given a hard fight to the finish. In both games, and especially in the first, there was shown a great lack of condition. Fifty per cent of the Dentistry Faculty were out in uniform.

JACK WRIGHT AND LESLIE MEET FOR COLLEGE LAURELS

Play Today in Finals For Dr. Martin Cup
LESLIE BEAT PERRY
Advance to Final Round While Champion Eliminated Peters

Jack Wright and Charlie Leslie met this morning at 11 in the final match for the Dr. Martin Cup, emblematic of the singles championship of the University. Leslie won his way into the finals by defeating Stan Perry in straight sets yesterday afternoon. The score was 6-1, 6-2. Wright, the defending champion beat Charlie Peters in the other semi-final by a 6-2, 6-1 score. Arrangements have been made for seating a number of spectators. Mr. C. S. Bann, former vice-president of the P.Q.L.T.A. will referee the match, and Mrs. Vaughan the donor of the cup will present it to the winner.

Leslie played a phenomenal game to beat Perry in short order. The Marl-times' champion is at the top of his game and should make things hot for the titleholder. Perry could not cope with his burning forehand drives and clever chops and placements. Leslie's unsteady backhand however, accounted for several of Perry's points.

Charlie Peters offered some fair opposition to Wright in the last semi-final. The weather was no incentive to play, a slight drizzle falling throughout the play. The moisture, together with the cold made things fairly uncomfortable for the players. Peters started out in good fashion, extending Wright to deuce on the latter's first service and then winning his own by 4 points to 2. His evident nervousness upset his usually steady game, however, and numerous double faults and misplays resulted. The point score was 61 to 33 for Wright. The latter played a rather careless game, evidently taking few pains to play decisively.

Today's battle is expected to produce a high grade of tennis. Both contestants rank among the finest exponents of the game in Canada. Leslie has just completed a successful summer of tournament play. He won the cham-

LIGHT AND SMITH RENAMED COACHES

Will Again Guide Boxers and Wrestlers

Bert Light last year's popular boxing coach will again look after McGill boxers this year. This was decided at the opening meeting of the representatives of the B.W. and F. Club in the McGill Union.

The boxers who in previous years have used Molson's Hall will have new quarters this year. The whereabouts of the latter have as yet not been definitely decided, although they will most likely be in either Strathcona Hall, or in the Montreal High School.

Coach Bert Light extends a hearty invitation to students of all years, and to Freshmen in particular. For the latter it would be well to remember that in past years a great number of men have won their letter in the intercollegiate meet who had had no previous experience.

The practices will take place on Tuesdays and Thursdays at five as before.

Coach Smith will take care of the wrestlers again this year. They will turn out on Mondays, Wednesdays

and Fridays at five at Strathcona Hall. All entries must be in the Daily office by 6 o'clock on Monday, Oct. 11.

ENTRIES FOR GOLF MATCH
Must be in Daily Office Before Monday, Oct. 11

Arrangements have been made to have McGill Daily receive all entries for the annual Students vs. Staff golf match, which will take place this year on Oct. 15. The entry slip must contain the player's name and handicap and the name of the club where such

GOOD BURLESQUE AT GAYETY NEXT WEEK

Miss Carrie Finnell and Her "Red Headed" Blondes

It will delight lovers of burlesque to know that an event of signal significance is scheduled for next week at the Gayety, when on Sunday evening the dynamic Carrie Finnell and her Red Headed Blondes will inaugurate an engagement of real honest-to-goodness burlesque, brimful of genuine humor and bubbling over with catchy songs and an abundance of expert dancers, who dance everything from the Hula Hula to the Tango. Carrie Finnell, is a veritable whole show in herself, and she is acknowledged to be one of the most alluring exponents of the Shimmy, she has a wealth of Titian golden tresses, and aside from all of this, she is the fortunate possessor of the most perfectly formed legs on the stage today.

Carrie Finnell is not the only red headed person in the show, for strange to say that the entire chorus comprises dashing and beautiful girls all of whom possess burnished golden locks, and each one contends that her hair is the most alluring of the lot, there is one thing however, that they all agree upon, and that is, that they are the most fascinating coterie of export dancers ever congregated with a burlesque aggregation. In addition to the fun making of Benny Moore, there is Nat Fields, I. J. Irving, Eddie Butler, Jessie MacDonald, Gaby Fields, and Mickey Reed who all lend valuable assistance in making this show one of the most substantial hits of the season.

DR. CALDWELL SAW GERMANY ENTER

(Continued from page one.) English—the two official languages of the League—although Stressemann addressed the Assembly for the first time in German.

Another outstanding and memorable acquaintance in Switzerland Dr. Caldwell said, was the great Paderewski. At the request of Madame Paderewski Mrs. Caldwell has commenced with her correspondence upon matters of common interest. Never had he seen in a single house, Professor Caldwell stated, so many signed photographs of the world's greatest ones—kings, popes and leaders of all kinds as are to be seen in the reception rooms of the Paderewskis. The magic of this great man's name and fortune meant nearly everything to Poland in the early days of the new republic. He is still one of the outstanding figures in Europe, and looks well and strong and rested in his castle in the Alps.

As he has already stated in the Press Professor Caldwell had a long interview in the War Office in Warsaw with the famous Marshall Pilsudski, a force of great importance in past and present Polish politics. Professor Caldwell was also entertained in Warsaw, amongst others, by the Polish Foreign Minister, Zaleski, with whom he had further conversations in Geneva. Zaleski knows English political thought well having been a student in the London School of Economics, and Professor Caldwell discussed with him some of the resemblances and differences between Polish and English conceptions of liberty and the right of veto.

Professor Caldwell went on to say that he had been again impressed on this last trip with the feeling of brotherhood that exists now among University students all over the world and of the responsibility they all seem to have, and ought to have, for the shaping of the world of tomorrow. He has been interested, he says, in some of the higher forms and expressions of this feeling such as the really great and important Y.M.C.A. work of American and Canadian agencies in Central Europe, the World Christian Student Movement and the movement for Intellectual Co-operation that is one of the many subsidiary agencies of the League of Nations, and that is coming from the Universities on their own account. If our Canadian students, he said, know more about the difficulties under which many Continental students obtain a University education and about some of the many difficulties of the intelligentsia generally in Europe, they would appreciate somewhat more than they do the really important things in education. As Sir Arthur Currie noted in his opening greetings there is need today, especially in Canada and America, of something more than the merely specialized and would-be practical, and the merely haphazard training of many of our students. The times, of course, are changing and we are all "realists" now as we were all declared by Laveleye to be "all socialists now," but everything depends on our conception of the thing we believe to be real, and the things we would seek to make real.

Everywhere said Professor Caldwell, in London and all over the Continent, was the question of our Canadian election keenly and intelligently discussed, and along with it the question of the relation of the component parts of the Empire to each other and to the Motherland. The Empire must be strong in itself and

CLASS EXECUTIVE ELECTED

Dentistry '28 Chooses Reg. Winn as President

At a class of Dentistry '28, held on September 28th the following officers were elected for the coming year. Reg. Winn, President; Jack Morton, Vice-president; Jack Mahoney, Sec.-Treas.; Bob Bell, Athletic Manager. At the same meeting Bill Walker was elected representative on the Junior Prom Committee and Larry Hooker as representative on the Annual Board.

realize its power as a world force. To be strong in itself it must be strong. However, in Europe, for as President Masaryk once said to Professor Caldwell, England "could lose" her Empire in Europe, or in regard to European difficulties—before we could all act together as it were. It is not enough to say "we are an empire," if we do not become more and more organically united. It is for the Universities of the Empire to find out and to state our common ways of thinking about things. Education is the greatest cement of the Empire, he concluded.

For the third consecutive year the first aid team of the Constabulary at the Windsor Street Station, Montreal, carried off the "Gutellus Cup" symbolic of the highest marks obtained in the Quebec District C.P.R. first aid competition. The examinations were conducted at the Place Viger Hotel in Montreal, September 29th by Dr. Beatty, chief surgeon of the Canadian Pacific. Four other teams were in the field including two from the Angus Shops in Montreal, and one from Ottawa and Quebec.

Sometimes wisdom comes with years and sometimes the years come

JACK WRIGHT AND LESLIE IN FINALS

(Continued on Page Three.)

pionship of the Maritime provinces in convincing fashion. In the eastern Canada championships held at Toronto he lost out in the quarter final to Leroy Rennie, former Canadian champion in a hotly contested five-set match. Leslie reached the semi-final of the Ontario championships when he was eliminated by Art. Hain, member of the Canadian Davis Cup team.

Wright is prominent as a member of the Davis Cup team for the past three years, and is now considered Canada's foremost player. He travelled to Cuba with the team and succeeded in defeating Dr. Vincente Banet of the Cuban, thus scoring a point for Canada. Two years ago he extended Gerald Patterson, of the Australian Davis Cup team to five sets, narrowly missing a score for Canada.

Among Varsity's most prominent players this year are Gilbert Nunns, Don Gunn, late of R.M.C. and Walter Martin, champion of Regina. Toronto's hopes for an intercollegiate tennis championship received a setback in the graduation of Art. Ham, but this is offset by the addition of several expert players.
